Information Technology Sector

19. *June 26*, *Softpedia* – (International) **Click-fraud attack morphs into ransomware risk in a couple of hours.** Security researchers at Damballa discovered that a threat actor dubbed RuthlessTreeMafia is distributing exploit kits along with the Rerdom malware in a click-fraud campaign in which they sell other threat actors access to infected users' systems. Researchers observed an infection result in the delivery of the CryptoWall ransomware.

Source: http://news.softpedia.com/news/click-fraud-attack-morphs-into-ransomware-risk-in-a-couple-of-hours-485395.shtml

20. *June 26, Securityweek* – (International) **Default SSH keys expose Cisco's virtual security appliances.** Cisco reported that customers using its Web Security, Email Security, and Security Management Virtual Appliances were vulnerable due to the products' use of default secure shell (SSH) keys, which could allow an unauthenticated, remote attacker to connect to a system with root user privileges. The company released a patch addressing the issue.

Source: http://www.securityweek.com/default-ssh-keys-expose-ciscos-virtual-security-appliances

21. June 26, Softpedia – (International) 94% of Android devices vulnerable to bug exposing memory content. Security researchers from Trend Micro discovered security flaw in the Android operating system's (OS) debugging component in which an attacker could create a special Executable and Linkable Format (ELF) file to crash the debugger and view dumps and log files stored in memory, or to create a denial-of-service (DoS) condition. The issue affects all Android versions after 4.0, Ice Cream Sandwich.

Source: http://news.softpedia.com/news/94-of-android-devices-vulnerable-to-bug-exposing-memory-content-485382.shtml

22. *June 25, Threatpost* – (International) **Stored XSS flaw patched in Thycotic secret server.** Thycotic patched a stored cross-site scripting (XSS) vulnerability in its Secret Server product in which an attacker could use JavaScript code in the browser of a valid user to toggle the password mask and steal a victim's stored passwords. Source: https://threatpost.com/stored-xss-flaw-patched-in-thycotic-secret-

server/113473
